

## GOOGLE CHROMECAST CONTENT SHARING

*Play your favourite content in-room with Tripleplay Chromecast support*

Media consumption methods have changed, more and more people access media content via on-demand subscription services like NetFlix, Spotify and YouTube; allowing them to take their content with them anywhere they travel and ensuring a personalised home-from-home experience.

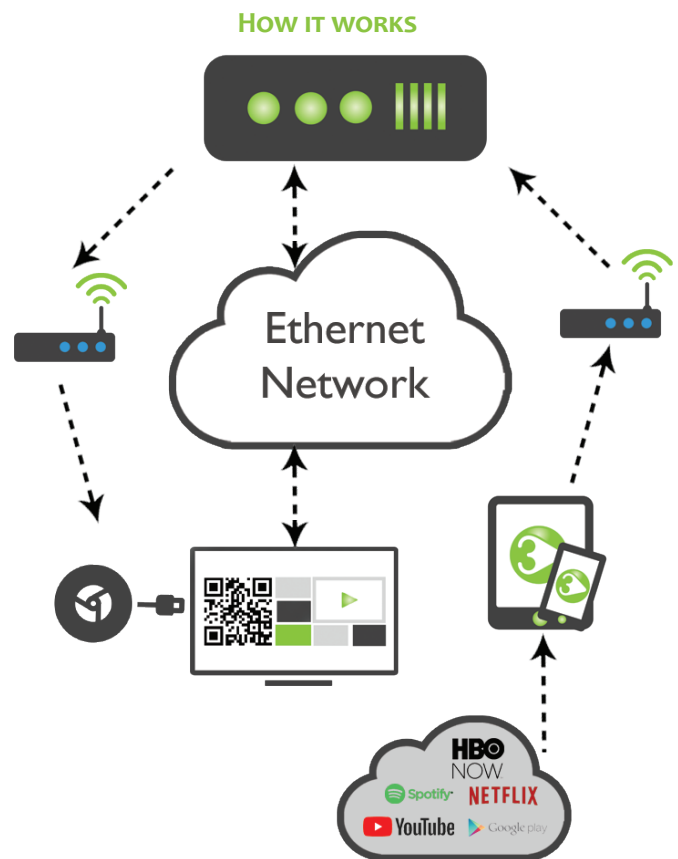

Tripleplay's Interactive IPTV Portal\*, one of the world's leading in-room entertainment and IPTV platforms, now supports secure Google Chromecast device streaming; allowing clients across the globe to enable Bring your own Content (BYOC) for guests and enhance any visit!

### TRIPLEPLAY CHROMECAST SUPPORT INCLUDES;

- Support for 1000's of Chromecast enabled apps
- Option to deliver to Smart TV and/or Set Top Box
- Power over USB
- Device disconnection alerts
- Simple access from branded Interactive Portal page

### CORE REQUIREMENTS

- Tripleplay Interactive IPTV Portal
- Tripleplay Caveman 2.0 software build or above
