

## PLAYMEDIA CONTENT SHARING

### Bring your own content app for Set Top Box and Smart TV

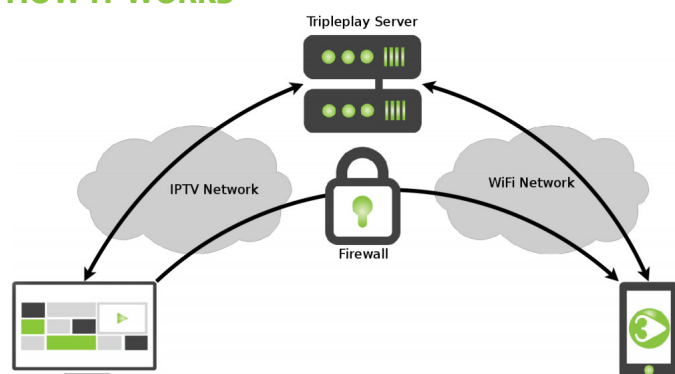

Tripleplay's content and media sharing application, PlayMedia allows users to share their personal content with a Tripleplay Interactive IPTV Portal solution on supported Set Top Boxes, Media Players or Smart TV technology.

Allowing users to display their personal images, videos and music files on their TV, PlayMedia is an essential extra for any hotel, hospital or commercial environment looking to deploy a future proof and feature rich IPTV platform with bring your own content capabilities (BYOC).

Downloadable from the App Store and Google Play, PlayMedia is available for both iOS and Android devices making it available for up to 99.6% of the global mobile phone and tablet market.

For added security, the PlayMedia Content Sharing app only allows pairing via QR code, preventing unwanted external or malicious connections and no user data is stored on the Tripleplay server or local screen.

#### HOW IT WORKS
